If you have forgotten your password:

- Click the “Forgot my password” link.
- Enter your e-mail address or user name and click the “Mail me a new password” button. You will receive a new password via e-mail.

The screenshot shows the EOS Data Gateway website in a Microsoft Internet Explorer browser window. The address bar shows <http://edgwww.cr.usgs.gov/pub/ins/welcome/>. The main content area is titled "Get a New Password" and includes a link for "Have a question, a problem, or a comment?*" and a "Help for this page" link. Below this is a section for "Forgotten your password?" with instructions: "You can use this form to change your password and have the new password e-mailed to you." The form contains two input fields for "Please enter your email address or user name:" and "Again, for validation:", followed by a "Mail me a new password" button. A note states: "Note: This form is *not* for Data Access Key changes. Please contact the appropriate User Services Office listed below to obtain a new Data Access Key." A list of offices includes ASF - asf@eos.gsfc.nasa.gov. Below the form, there are links for "If you prefer, you can skip this for now and [start searching](#) as a guest." and "You can also return to the [EDG home page](#)." A footer section includes links for "Comments, Questions, or Problems? [Email us*](#)", "Created by EOS Data Gateway version 3.6.1", "Webmaster: Chao-Hsi Chang (chao-hsi_chang@sesda.com)", and "Responsible NASA Official: Medora Macie (Mail Code 423, NASA/GSFC, Greenbelt, MD 20771)".

The sidebar on the left contains a "NEW!" banner, a link to "Land Processes Distributed Active Archive Center", and a "Notice: If you are new to the EOS Data Gateway, visit the LP DAAC's customer support page." Below this is a "NASA Earth Observing System" logo and a search bar. A red arrow points from the "Forgot my password" link in the sidebar to the "Forgot my password" link in the main content area. The sidebar also includes links for "Landat Orthorectified Data Available", "Current LP DAAC Data Center Names", "Landsat 7 SLC-off Data Available", "Version 3.0.10.0 Transfer from NASA to USGS", "ASTER On-Demand Update", "Important Information from EDC", "Scheduled Down Time (CST)", and "Thursdays 7-11am".

Alerts section:

Due to the number of large data requests, ECS orders may be delayed for several days. As an alternative, you may use the Data Pool option, located in the On-Line Access column in EDG, or use <http://daac.gsfc.nasa.gov/data/datapool> and download your data via FTP. The Golden Month of MODIS/Terra V003 is again available. All other MODIS Terra V003 have been superseded by reprocessing to Version 004.

LP DAAC

- **Thu, 16 Sep 2004 12:00:00 UT to Thu, 16 Sep 2004 16:00:00 UT:**

Search, browse, and order capabilities for ASTER, MODIS, and USGS data sets (GTOPO30, NALC, SIR-C, etc) will be unavailable through the EDG on Thursday, September 16, 7 am - 11 am CDT (1200 - 1600 GMT).

- **now to further notice:**

ASTER On-Demand Data Product orders may experience short intermittent interruptions. If you do not receive an OrderID, the data will need to be reordered. We apologize for any inconvenience.

Log On to the EDG (cont.)

Once Logged On to the EDG, users have several ways to begin searching for data. The first step involves choosing your Data Search Type:

- [Primary Data Search](#)
- [Data Granule ID Search](#)
- [Local Granule ID Search](#)

Primary Data Search

A Primary Data Search allows users to quickly view data sets related to their interest areas and is organized along two methods:

- By Discipline
- By Categories/Attributes

NOTE: The EDG is set up to default to a Primary Data Search using the By Discipline method. This tutorial will cover searching for data By Discipline.

Primary Data Search (cont.)

To create a Primary Data Search using the By Discipline method:

- Log On to the EDG to begin a search and order session.
- Choose your data sets based on discipline and sensor.

The screenshot displays the NASA Primary Data Search web interface. On the left is a navigation sidebar with links for 'Skip navigator', 'Starred links', 'User Name' (guest), 'Search and Order', 'User Preferences', 'Search Creation' (highlighted), 'Search Status', 'Results: Data Set', 'Results: Granule', 'My Folder', 'Shopping Cart', 'Exit to Home', 'Search types', 'Data Search' (highlighted), 'Detailed Document', 'Summary Document', 'AIRS Browse', 'Help', 'Tutorial', 'FAQ', 'User Support', 'User Support Contacts', 'Check Order Status', 'Other EDG Sites', 'HDF Viewing Tool', and 'Ask a Question'. The main content area is titled 'Search Creation: Primary Data Search' and includes links for 'Have a question, a problem, or a comment?*' and 'Help for this page'. Below this is a 'Choose Data Sets' section with a 'Text Search' box and 'Go'/'Help' buttons. Instructions for selecting data sets are provided. A table lists data sets categorized by discipline: Atmosphere, Cryosphere, Land, Oceans, and Solar/Other. Each category has a list of sensors with radio buttons for selection. At the bottom, there are radio buttons for 'By Discipline' (selected), 'By Categories/Attributes', and 'Choose a Data Search Type' with options for 'Primary Data Search' (selected), 'Data Granule ID Search', and 'Local Granule ID Search'. Two red arrows point to the 'Data Search' link in the sidebar and the 'Primary Data Search' radio button.

[Index Page](#)

Data Granule ID Search

A data granule ID is a set of characters that identify each individual granule of a data set. Data granule IDs have no standard format. A data granule is the smallest amount of data that can be independently searched for, described, and ordered in the EOS Data Gateway.

Data Granule ID Search

The Data Granule ID Search is similar to the Primary Data Search, in that it provides results that contain descriptions of specific data granules from one or more data sets. Data Granule ID searches can be done for both EOS and non-EOS data. Users of the Data Granule ID Search must know the IDs of the specific data granules that are wanted.

NOTE: Not all data centers support Data Granule ID Search, so you may have to switch to Primary Data Search if the Data Granule ID search is unsuccessful.

Data Granule ID Search

To create a Data Granule ID Search using the By Discipline method:

- Log On to the EDG to begin a search and order session.
- Choose your data sets based on discipline and sensor.

Choose Data Sets

Text Search:

*Pick a discipline/topic (for example: Atmosphere:MISR), then choose from the list of data sets.

Local Granule ID Search

A local granule ID is applicable only to data from EOS satellites. A local granule ID search is done typically by an advance user who knows the exact granule of interest.

Local granule IDs have specific formats that provide information about the granule to the user. Local granule IDs and data granule IDs are two separate and distinct identifiers.

Local Granule ID Search (cont.)

Note that an EOS data granule has both a data granule ID and a local granule ID associated with it. The local granule ID contains more information about the data granule than does the data granule ID.

Local granule IDs have a specific format that is dependent upon from which EOS instrument the data is taken and the data's science discipline.

Local Granule ID Search (cont.)

The following is an example of the naming convention of an ASTER Local Granule ID:

AST_L1B_003_04302000030026_04192003055800

TERM	DEFINITION
AST_L1B_003	AST_L1B version 3 product
04302000	Data acquisition date of 04/30/2000
030026	Acquisition time of 03:00:26 (03 hour 00 minute 26 second)
04192003	Data production date of 04/19/2003
055800	Production time of 05:58:00 (05 hour 58 minute 00 second)

Local Granule ID Search (cont.)

The following is an example of the naming convention of a MODIS Local Granule ID:

MYD09A1.A2004233.h10v05.004.2004247195614

MYD09A1 Data Type (ie. Aqua 8-Day Surface Reflectance)

- Acquisition Year (2004) Julian Day (233)
- Horizontal Tile # **h10**
- Vertical Tile # **v05**
- Production Version # **004**
- Production Year **2004**
- Production Julian Day **247**
- Production Time (HH:MM:SS) **19 56 14**

Local Granule ID Search (cont.)

To create a Local Granule ID Search using the By Discipline method:

- Log On to the EDG to begin a search and order session.
- Choose your data sets based on discipline and sensor.

Choose Data Sets

Text Search:

*Pick a discipline/topic (for example: Atmosphere:MISR), then choose from the list of data sets.
For multiple topics: choose one topic & data sets, then the next topic & data sets.

Search Results (cont.)

Granule Listing:

- When the results are returned, you will see a table of granules. A granule is the smallest aggregation of data, which is independently managed in the archive. For example, one granule for ASTER data would be one ASTER scene.
- In the “Granule Identifier” column, if there are two numbers listed, the first number is the Data Granule ID and the second number (in parenthesis) is the Local Granule ID.

Results: Granule:
